Dave Sommerville

Full-time student | Full Stack Development

Currently enrolled in Software Development at Manitoba Institute of Trades and Technology, I have learned and am actively improving my skills in

HTML, CSS, Git, and JavaScript
In 2025 I will be learning C++ and React as well.

I'm a passionate and driven student, trying to push myself beyond the course's content. I feel that I have established a strong portfolio for my experience level, but I'm very excited to continue to improve upon it.

For my portfolio so far, please see my student website at
